—Keepass

-Policies

## Templates

A *“template.txt”* is for current the namespace/category its in and a *“%%”\_template.txt“%%* is for the current namespace/category and every other one below.

If a new Site is created the following template is used:

```
===== @!PAGE@ =====
Description of this namespace. \\
<nspages -h1 -subns -exclude -textNS="Subcategories:" -textPages="Pages in
this subcategory:" -hideNoPages -hideNoSubns>
```

## Lists

List as used above (“Subcategory:” and “Pages in this subcategory:”) while hiding if one of this two points is empty.

```
<nspages -h1 -subns -exclude -textNS="Subcategories:" -textPages="Pages in
this subcategory:" -hideNoPages -hideNoSubns>
```
