

# Matrix Synapse Miscellaneous

Different things, sometimes advanced and some things that just did not fit in the regular guide.

## Coturn

Coturn is a turn server and it is used for 1:1 voip calls through the client (example: riot).

```
apt install coturn
```

Edit Config files

opening ports

## Installing Bots

Matrix Synapse currently does not have a concept of bots, a bot is just a normal user. Usually there is a config and a .py file, download the files, unpack them and run the .py file. Running and downloading things via pip is not recommended.

Install python3

```
sudo apt install python3
```

then install pip

```
sudo apt install python3-pip
```

then matrix-bot-api from pyp

```
pip3 install matrix-bot-api
```

and finally fill out the config and start it

```
python3 pollbot.py
```
