Riot.im

Screensharing

Shift-click the video call button for 1:1 screen share.

Slack-Bridge

What a lot people miss: invite the riot-bridge to the correct channel on the Slack side.

Proxy

Create a `riot.cmd` file wherever you want where you add the following line

```
START "" "%LOCALAPPDATA%\riot\Riot.exe" --proxy-server=http://proxy:3128
```

Multiprofile

Create a `riot.cmd` file wherever you want where you add the following line.

```
START "" "%LOCALAPPDATA%\riot\Riot.exe" --profile=profile1
```

Now you can start your original riot.im application with your original account and the riot.cmd with the new profile for testing purposes for example.

Enter Dev-Tools

To view errors and get an overview over network `CTRL + SHIFT + I` (Should work in general in Electron-Apps)
